Statement of Reasons for Allowance

1. Claims 1-10 and 12-21 are allowed.
2. The following is an examiner's statement of the reasons for allowance.

The present invention is directed to a method and system for controlling access to proprietary data from a browser and intermediary server. The distinguishing feature of the method and system for controlling access to proprietary data is the message including hidden data and the proprietary content URL, the message configured to cause the browser to automatically request the proprietary content from the proprietary provider at the proprietary content URL without indicating to the user that the proprietary content was requested from the proprietary provider, the hidden data comprising at least one of information about the organization, the user that activated the link, the assignment, and the proprietary provider, the hidden data being used to control distribution of the proprietary content to the browser and the user's interaction with the proprietary content in completing the assignment.

The closest prior art, Alcorn et al. (US Patent No. 6,988,138), Bjornestad et al. (US Patent No. 7,003,576) and Ward (US Patent Application Publication No. 2002/0138841), taken in combination show similar characteristics of a Learning Management System (LMS) controlled by an organization. However, Alcorn, Bjornestad and Ward, singularly or in combination, still fail to anticipate or render the above-cited limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
